

Vacuum Suger 12.000 l/min ATEX & DNV 2.7-1 er en ekstremt højt ydende og effektiv vacuum suger. Når der udføres tømning og rengøring kan sugning foregå dybt nede i processen - op til 40 meters vertiical sug, pga. den høje kapacitet på airflow som suger vand, oil, partikler osv.

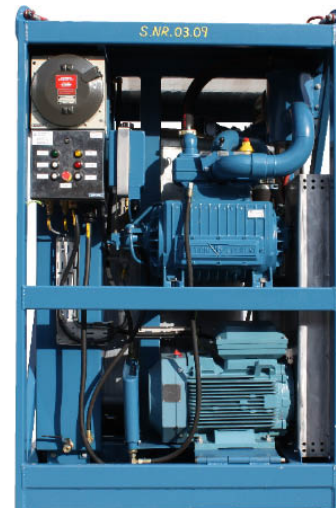

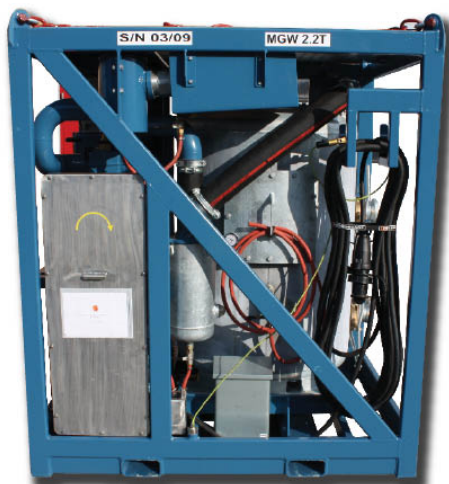

Det anbefales, at der i el-forsyningen til enhederne anvendes automat sikringer af typen N(C) eller N(D) eller type aM, hvis der anvendes smeltesikringer.

Vacuum enheden fungerer godt i brug sammen med vore 1,5m<sup>3</sup> DNV 2.7-1 drop tanke.

### Tekniske data

Størrelse (L x B x H):	1400 x 1900 x 2100 mm	Strømforsyning:	3 x 400 V
ATEX Klassifikation:	Zone 2, Eex IIB 3G T3	Spænding:	58 A
Ramme type:	DNV 2.7-1	Arbejds radius:	Hose dependant
Vægt:	2200 kg	Max. tryk:	1,5 bar
Fladelast:	827 kg/m <sup>2</sup>	Tank volume:	1100
El-stik type:	CEAG EX 63
