

Machine Name

Vacuum Unit ATEX & DNV 2.7-1

Description

Vacuum Unit 12.000 l/min ATEX & DNV 2.7-1 is an extremely efficient vacuum unit with very high performance. When performing cleaning work suction can be done deep down in the process, at up to 40 metres distance, due to the high capacity airflow, which carries water, oil, etc. in the airflow.

It is recommended that in the power supply to the devices N(C) or N(D) - type of circuit breakers is used or type aM for fuses.

The vacuum unit works very well together with a drop tank 1,5 m³ DNV 2.7-1 - learn more about this unit in our product category Drop Tank.

Technical data

Size (L x W x H):	1400 x 1900 x 2100 mm	Power Supply:	3 x 400 V
ATEX Classification:	Zone 2, Eex IIB 3G T3	Current:	58 A
Chassis Type:	DNV 2.7-1	Working Range:	Hose dependant
Unit Weight:	2200 kg	Maximum Pressure:	1,5 bar
Footprint:	827 kg/m ²	Tank Volume:	1100
Plug Type:	CEAG EX 63
